

How to choose a perfume?

Choose the type of fragrance or perfume notes you like. Open the sample and apply a small amount of perfume on your skin, or a sample strip. Let the perfume develop completely, give yourself time to experience the abundance of ingredients. In the first minutes, a delicate, vibrating head note prevails. Then, the heart note unfolds. At the end, we discover the base note. Remember that you do not have to choose just one perfume, you can select several, for various occasions.

What fragrance are you looking for?
